Chicago

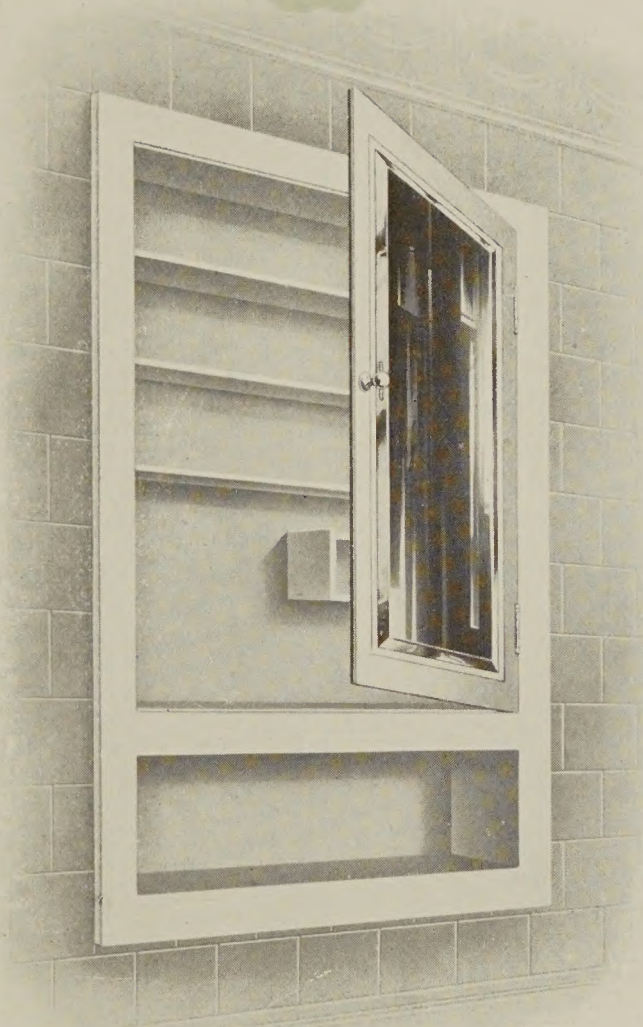

THE HESS STEEL MEDICINE CABINET OR BATH ROOM LOCKER is the finest offering in the line of sanitary accessories to the home—the hotel—the apartment house.

It is in line with the popular tendency to adapt fireproof and sanitary materials to the construction of household appliances and to general building construction. Its novelty — its beauty, and its qualities of cleanliness and durability commend it to owners, architects and builders, alike.

It is not a luxury, but a necessity, and at the price asked for it, it's a real economy, as compared with the ordinary wooden construction.

Enameled steel has many advantages over wood. It is handsome; it never warps, shrinks, swells, sags, nor opens in the joints. It is non-absorbent and will not stain as will wood.

The Recessed Cabinet, Style E—With open
shelf below

THREE

The inside being enameled, is easily kept clean, and will not harbor vermin of any sort.

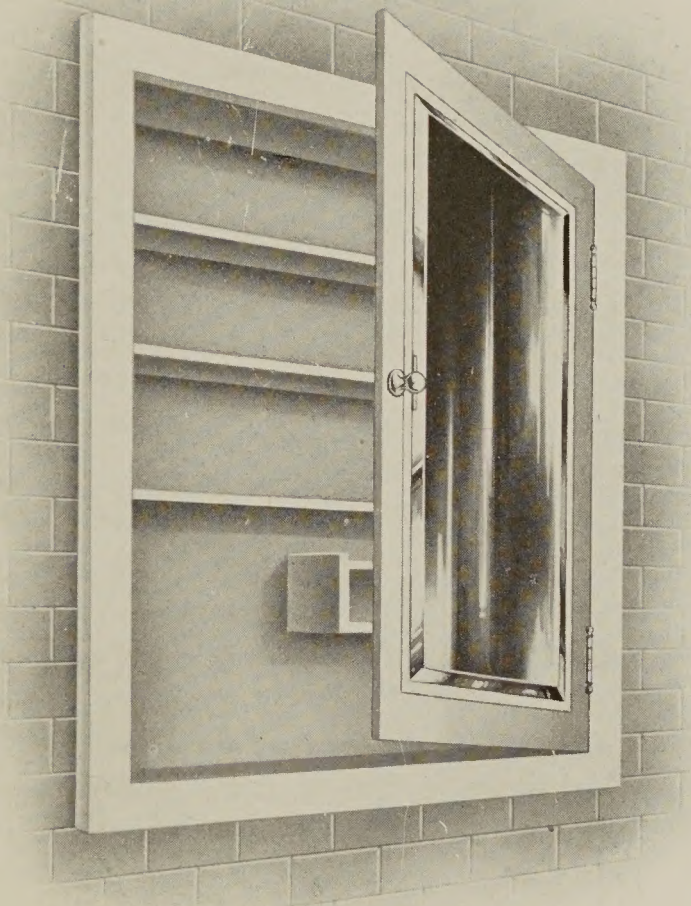

It is durable, and if it ever becomes marred or dingy, may be re-enameled at slight expense and will then look like new.

This beautiful cabinet is made throughout of soft, smooth, annealed steel, pressed and formed into shape by powerful automatic machinery.

It is made up in the most substantial manner, the corners of the doors and frames being solidly welded, and the various parts securely riveted or welded together.

It is heavily coated inside and out, with the best quality of snow white enamel, each coat subjected to a separate baking in gas heated ovens.

The result is a pure white, smooth, hard finish, which never cracks nor peels. It may be washed and cleaned with soap and water or

The Recessed Cabinet, Style F—The open shelf below is omitted

with furniture polish — and should be wiped dry after each cleaning.

The door recesses flush with the face of the cabinet, into a rabbeted jamb, and the face of it is beveled inward one-half inch around the mirror, giving it a handsome, “classy,” appearance.

It is furnished with a plate glass mirror, with beveled edges, or plain, if preferred; or a white door, with no mirror, will be supplied if desired.

Our mirrors are made of the best polished plate glass and are carefully selected: they are guaranteed to be satisfactory.

If specially ordered, we will supply doors with clear plate glass, through which the contents of the cabinet may be seen. Physicians and surgeons make use of such cabinets, as receptacles for instruments, etc.

The trimmings (hinges and turn handle) are of solid bronze, polished

The Outside Cabinet, Style H—No open
shelf below

SEVEN

and nickel plated, and attached with nickel plated screws or bolts.

The shelves are adjustable and may be placed at different heights to suit the purchaser. A large compartment is provided, in which quart bottles may be accommodated.

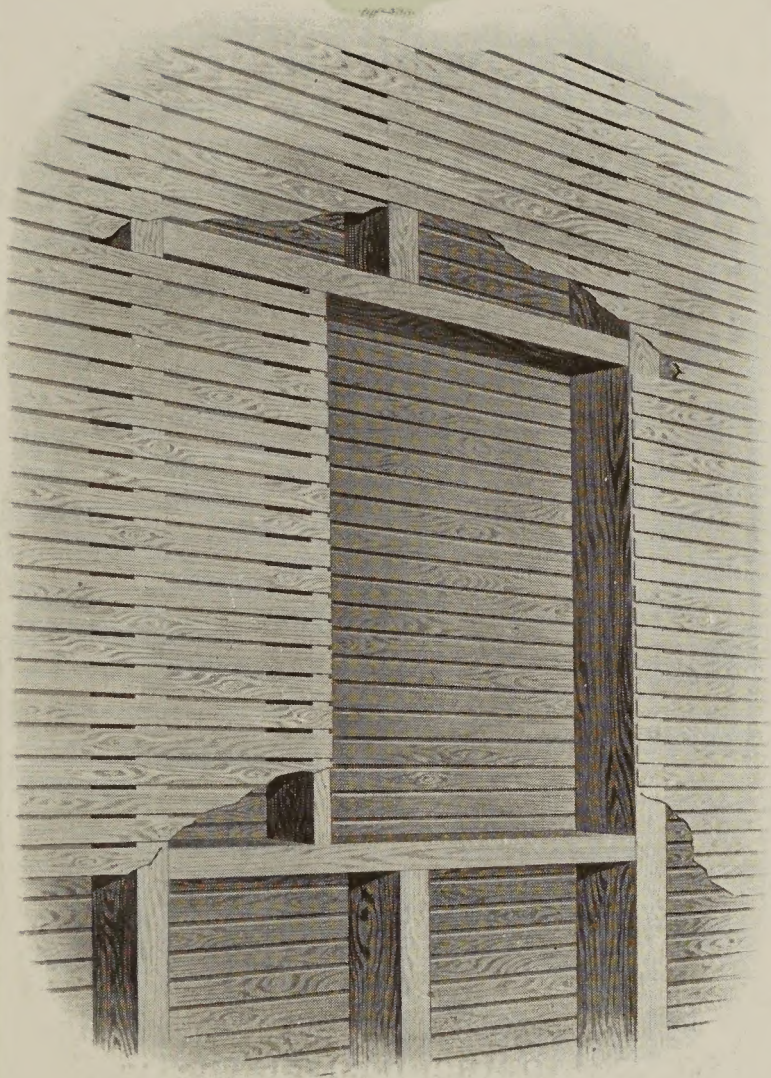

When not specified, the shelves are of white enameled steel.

We supply polished plate glass shelves also, at an extra price, if desired.

The regular locker is furnished with turn catch and handle. We supply a Yale cylinder flat key lock, with two keys, at an additional charge when specially ordered.

The locker is a beautifully finished article, suitable for any bathroom and in keeping with the finest of bathroom fixtures.

All lockers are right hand. Left hand lockers are supplied, when specified, at a slightly increased cost.

The Framed Opening for Styles
E and F

NINE

The locker is complete and ready for use when shipped. No fitting, nor work upon it is necessary. Four screws, which accompany the locker, are to be inserted, and the job is done.

In providing the recess for styles E and F care must be taken that the frame is square and of proper size.

Three-quarter inch grounds are required, and the plaster must come up flush and smooth to them.

The TOP of the opening is 6 feet 2 inches from the floor, which will bring the mirror in proper position for the average adult.

The recessed lockers require a depth of $4\frac{1}{4}$ inches from the face of the plastered wall to the back of the recess, and they project $1\frac{1}{4}$ inches from the wall.

Style H does not recess but is screwed to the face of the wall. Holes for this purpose are provided

in the back of the locker and sixteen inches from center to center.

If the studding does not come right to match these holes, cross-pieces of one-inch stuff should be attached to the studs, and the Cabinet screwed to the cross-pieces. Never support the locker on the lath alone.

Two sizes—Nos. 19E and 29F will fit between studding when placed 16 inches from centers. The larger sizes require the cutting of one stud.

CAUTION: Do not unpack the Cabinet nor put it in position till workmen are out of the building. It is apt to be marred or soiled. It is a piece of fine FURNITURE, and its installation should be deferred as late as possible.

Our locker is sold by plumbers, hardware and furniture dealers in many cities. If your dealer does not have a sample to show you, order

from us direct. We will guarantee to deliver the locker to you in good order, free from defects or damage, and the condition of your purchase may be that if, on its arrival, you are not entirely pleased, it may be returned at our expense for freight both ways, and your money will be refunded, or the charge against you cancelled, or you may order C.O.D. subject to examination before payment.

Each locker is packed in a strong wooden box secured in place with screws, so that no part of the enameled finish is in contact with wood or any packing material. We ship everywhere in the United States, to Canada, and abroad, and the lockers reach destination free from damage.

We guarantee this and will replace any that may be damaged in transit, free of expense to the purchaser.

HESS LAVATORY MIRRORS

are of the same material as the medicine cabinets and are prepared with the same care.

Especially desirable for hotels, clubs, etc., where there is no particular use for a medicine cabinet.

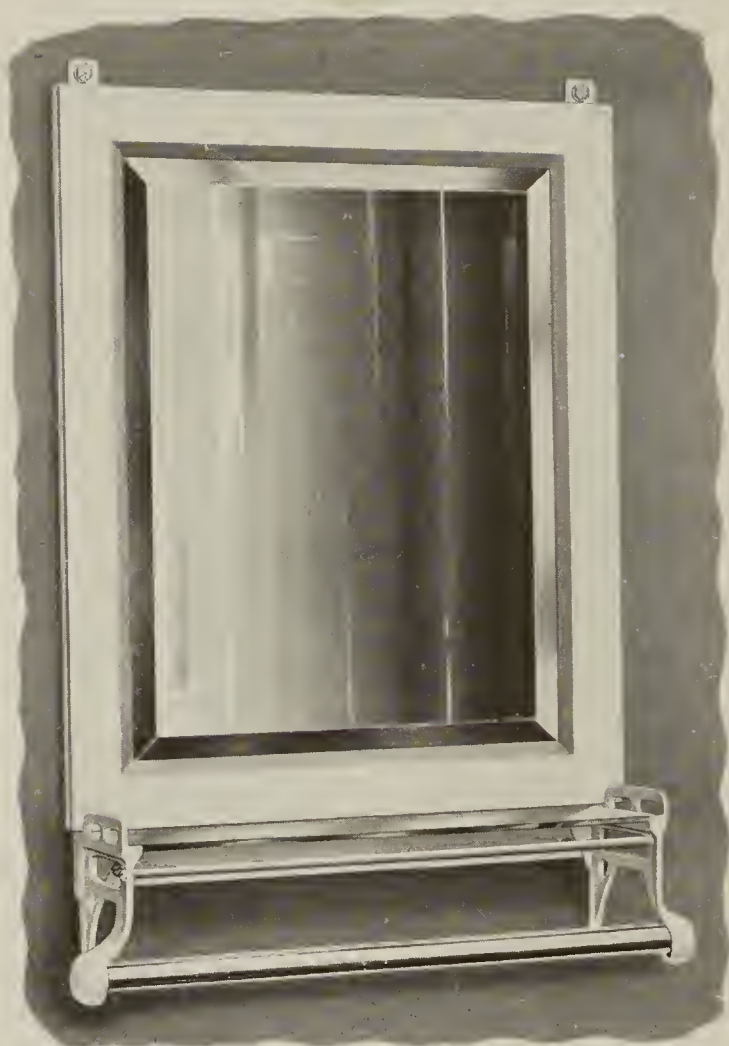

These attach to any wall by screws which accompany the mirrors.

Toggle bolts, for use in hollow tile or plaster walls will be supplied when requested.

The shelf shown in the cut is of polished plate glass supported by white enameled cast iron brackets.

The towel bar is of polished, moulded glass, of best quality.

Mirrors will be supplied less the shelf and bar, if desired.

Lavatory Mirror, Style A—With plate glass
shelf, and polished glass towel bar.
Five sizes.

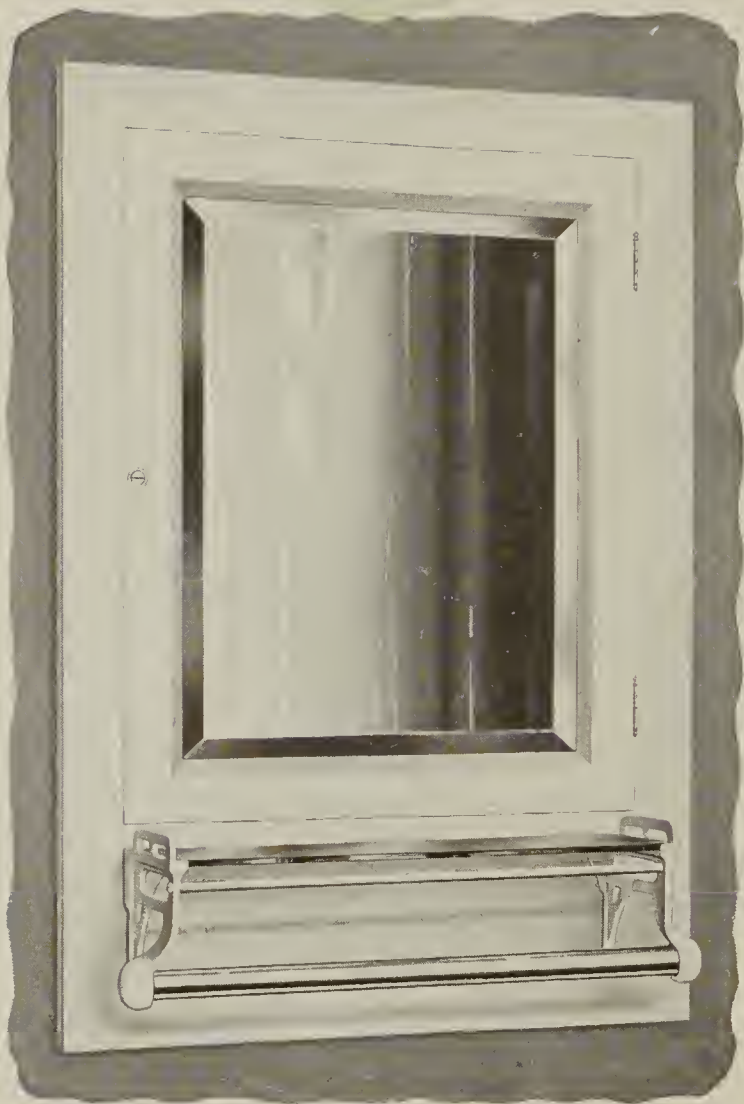

HESS

PIPE SHAFT MIRROR DOORS are intended for hotels and apartments where access to the piping system, back of the mirror is necessary.

These are made with or without cabinet backs, and are opened only by the use of a screw-driver or key, in the hands of some authorized person, when attention to the pipes must be given. Styles E and F cabinets are supplied to swing out, on hinges, when so ordered at an additional charge.

They are furnished with plate glass shelves and towel bars, similar to that shown on page 16, or with recessed pocket shelves—with plate glass bottom, and towel bar, shown on page 17. These will be supplied in five sizes.

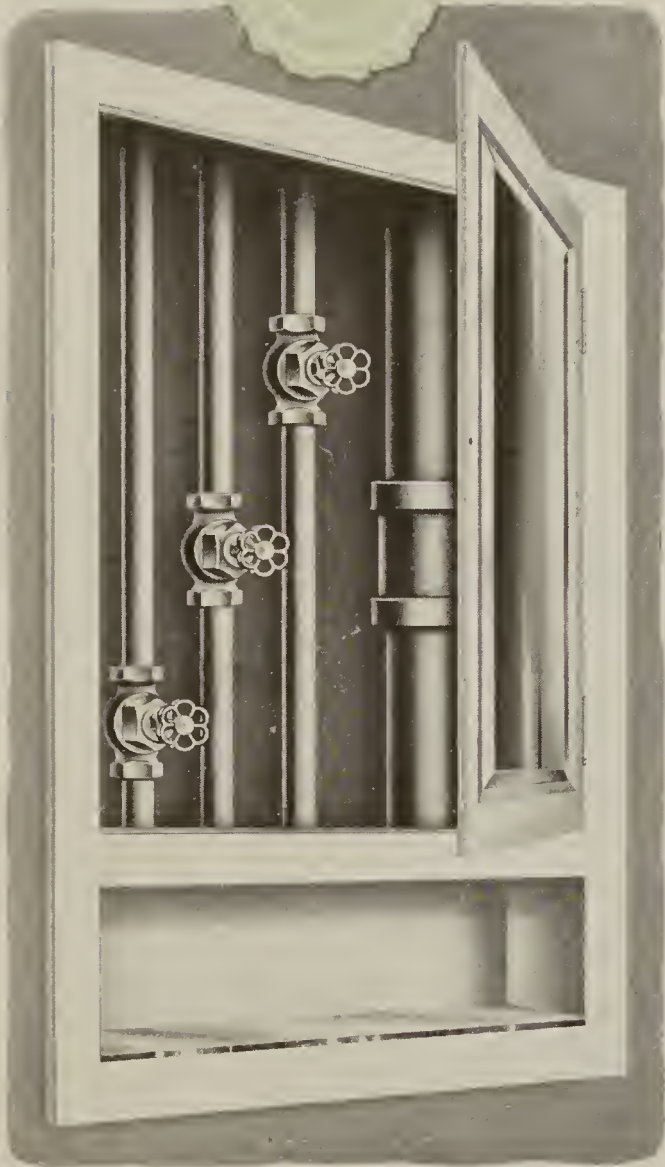

All mirrors are packed six in a box, but single mirrors are supplied with a slight extra charge for packing singly, when ordered.

Mirror Shaft Door and Frame, Style B—Without cabinet, with shelf and towel bar.

SIXTEEN

Five sizes.

Mirror Shaft Door and Frame, Style C—With pocket shelf below, and glass towel bar. Pocket extends four inches back of the face of the wall. Five sizes.

NINETEEN

A Health Furnace

PIPE OR PIPELESS HESS WELDED STEEL FURNACES

are used everywhere.

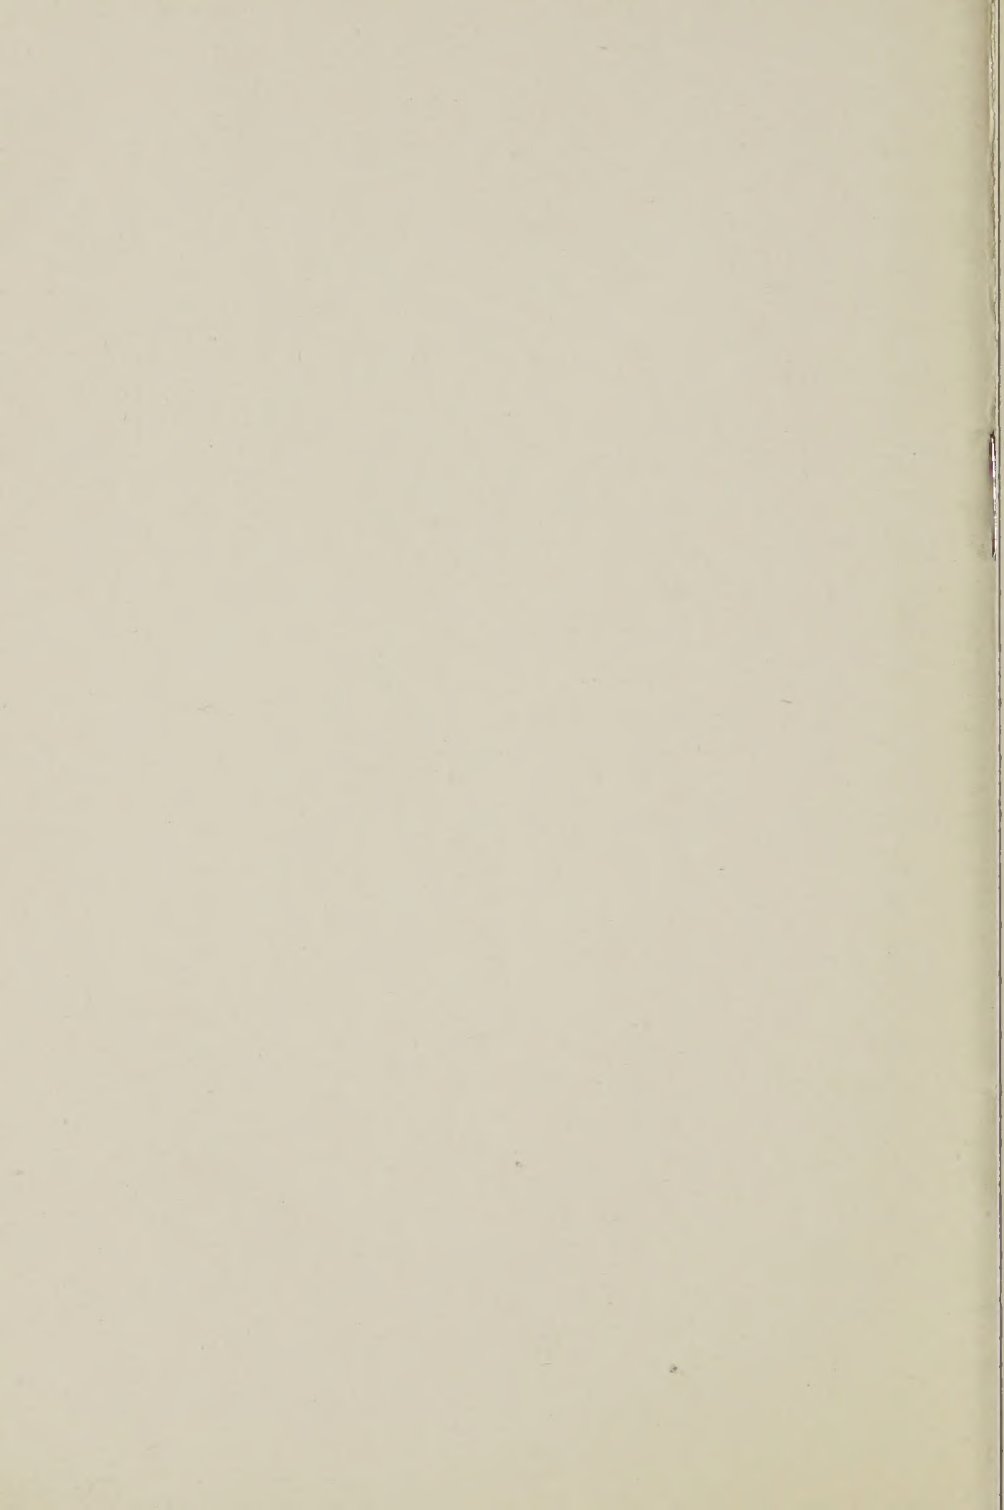

Every seam is riveted and then **WELDED**, and leakage of gas and dust is permanently impossible.

BURNS ANY FUEL and delivers all its heat. Responds instantly and is economical.

HUMIDIFIES THE AIR by evaporating an ample quantity of water—other Furnaces invariably fail in this.

Send us a sketch of your building. We will make a plan, showing how to heat it, with estimate of cost. No charge, no obligation for this.

Ask for our illustrated free book on heating. 48 pages of useful information.
